COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

HISTORY

Since 1970, the preservation work at the park has been done largely by park staff. The documentation of work done by park staff, first and second generation Navajo masonry workers, is primarily visual. Stabilization reports continued to be produced by binding before and after photos and treatment forms together. The last bound report was in 1986. The complete set of Stabilization Reports (1933-1986) have been cataloged individually, and form two series in two collections: Coll 0021/001: RSU reports from 1933-1969; Coll 0022/001: Stabilization reports from 1970-2010.

The negatives are being entered at the item level in a park-developed Microsoft Access database. Extra prints will be mounted onto photocards and filed by site, room, then year. The Preservation Crew will then use this photo file for reference for yearly preservation work. As of 2016, the park stopped assignment of individual negative numbers to the digital images and began numbering them within the archival collection hierarchy in order to alleviate a separate number tracking system.

SCOPE AND CONTENT

PARK PRESERVATION PROGRAM RECORDS

1970-2019 (bulk dates:)

CATALOG NUMBER CHCU 107310

VOLUME 89.7 LF

DESCRIPTION REPORTS, TREATMENT FORMS, PRINTS, NEGATIVES, CONTACT SHEETS, MAPS, MEMOES, PHOTOLOGS, PHOTO INVENTORIES, SOPs, ANNUAL REPORTS, COMPLETION REPORTS, TIME BOOKS, DIGITAL IMAGES.

Not all years will have reports, treatment forms, etc. For a few years, photograph logs have been updated or (re)created.

Backfill Photo Documentation Project

ORGANIZATION

ORGANIZED INTO SERIES:

- I. Stabilization Reports
- II. Backfill Reports
- III. Treatment Forms
- IV. Photo Documentation
- V. Administrative Records
- VI. Non-Park Preservation Records
- VII. Maps
- VIII: Work/Time Books & Planners
- IX: Backfill Photo Documentation Project

The 4x5" negatives are stored in the main negative collection in negative number order. The 120 and 35 mm negatives were stored in binders and transferred to document boxes.

Prints are stored in photo boxes by year, then by site.

Digital images are stored in the park Digital Archive (Preservation server).

SERIES DESCRIPTIONS

SERIES I: STABILIZATION REPORTS, 1970-1990

During the 1970s, stabilization work shifted from the RSU, based on Globe, to both the park and the newly created Western Archaeological and Conservation Center in Tucson. Between 1970-1976, reports were produced by park staff (Cecil Werito) and various NPS archaeologists based at SWAC/WACC. By 1977, reports were produced by either park staff or regional staff from Santa Fe working for the park. Thus, there is considerable overlap with Collection 21, Records of the Ruin Stabilization Unit from 1970-76. The date of 1970 was arbitrarily chosen as the start for this collection because it was the first year Cecil Werito produced a report, marking the assumption of preservation duties by park staff. After 1986, records were compiled on a yearly basis, but not bound.

By year, then by site

Stabilization Reports, along with some annual reports, preservation forms, completion reports, "before" and "after" collections

SERIES II: BACKFILL REPORTS, 1983-2005

Originally received from park in binders organized by site, years usually only spanning 2 or 3, the length of the project. Transferred out of binders into folders and document boxes using the same arrangement.

Arranged in chronological order

"Before" and "After" photos in plastic sleeves. "After" photos frequently taken a year or two from the time of the "Before" photo, even though it is the same project.

ARCHEOLOGISTS AT THE PARK CONSIDER THESE COLLECTIONS OF BEFORE AND AFTER PHOTOS OF A PROJECT A "REPORT" IN THE SAME WAY THAT THE BOUND STABILIZATION REPORTS ARE.

SERIES III: TREATMENT FORMS, 1983-2019

Arranged in chronological order and then alphabetically by site name.

Treatment forms, reports, maps.

No treatment forms for years 1984-1988 and 1994.

Treatment forms cover both Preservation and Backfill work. Maps of treatment areas are also often included with the forms.

SERIES IV: PHOTO DOCUMENTATION

ORGANIZED INTO 4 SUBSERIES in document boxes, photo boxes and binders in the freezers

004.001: Photologs

04.02 : Prints

04.03 : Negatives

04.04 : Contact Sheets and Crew Shots

PHOTOLOGS, PRINTS OF STABILIZATION WORK AND BACKFILL WORK, NEGATIVES, CONTACT SHEETS

Contact sheets begin in 1978, with the switch to 120, then 35mm film. Organized by year and by site, but not by negative number.

PRINTS OF PRESERVATION WORK

From 1970-1978, the preservation crew continued to use the 4x5" negative format used by the RSU crew, although in 1973-74, 35mm film was used. In 1979 the crew used a mix of 120mm and 35mm film. The 4x5" and the 1973-74 35mm negatives are stored in individual envelopes. The 120 and 35mm film from 1979 is stored in 3-ring albums.

Negative numbers were assigned in the early-mid 1990s to the images in the bound stabilization reports, in a series beginning with the 1938 report through the 1986 report. Thus, images in the volumes are in negative order number, but this order did not correspond in any way to the film strip negative order. Negative strips have been cut and rehoused in negative order number to facilitate retrieval.

During the switch of film formats, it appears that multiple cameras were used to record a single shot. Because the prints were numbered first, it is impossible to tell which format negative was used to produce the print. Thus, one print image may have both 120mm and 35mm negatives with the same number.

(Prior to receiving additional materials from the park in 2010: 1970-1979 SCOPE NOTE: Photodocumentation of Park Preservation Crew work at Chaco Canyon NM between 1970-1974. See Item Records for descriptions of individual prints. Sites stabilized include Pueblo Bonito, Pueblo del Arroyo, Pueblo Pintado, Chetro Ketl, Hungo Pavi, Penasco Blanco, Bc 50, Bc 51, Bc 57, Bc 58, Bc 59, Casa Rinconada, Talus Unit, Una Vida, Kin Bineola, and Leyit Kin.)

"Negative Sets" are organized into folders and document boxes. Contact sheets begin in 1978, with the switch to 120, then 35mm film. Organized by year and by site, but not by negative number.

(ORGANIZATION already entered into ICMS prior to receiving additional materials from the park in 2010. NEGATIVE COLLECTION is what is in the freezers?)

1970-1979: Negative numbers were assigned sequentially to prints in the bound stabilization reports. Because each stabilization action (usually on a room or kiva) has (ideally) both a before and after image, the two negatives associated with each action are from two time periods. Before and after images are often separated in date by months, and therefore come from different roles of film.

1980-1989: --

1990-2009: Organized into binders by year. Binders include contact sheets and negatives. Each binder has a list of negative number used for each site in the front.)

"Negative Sets" are arranged by year

NEGATIVE COLLECTION: Arranged by format:

1970-1989: arranged as follows: 4 x 5" negatives are arranged in negative order number in envelopes in boxes; 120mm negatives are in a 3-ring album; 35mm negatives from 1973-1974 are

1990-1999: are arranged by year in binders, then by site name within each binder. Negative numbers for each site are within a single range, but the negative numbers are not sequential within a single roll of film.

(ARRANGEMENT already entered into ICMS prior to receiving additional materials from the park in 2010. NEGATIVE COLLECTION is what's in the freezers?)

1970-1979: Arranged in negative number order, by format: 4x5 negatives are in envelopes in boxes and 120mm negatives are in a 3-ring album. 35mm negatives from 1973-1974 are housed in envelopes in boxes; 1979 35mm film is housed in an album. For 35mm negatives housed in albums, the location field will note this. All others are in the negative collection boxes.

Negatives were filed into NPS Negative Envelopes and Stabilization Record Envelopes. In the case of 35mm negatives in the main Negative Collection, because of the numbering system, one envelope might hold the before images, e.g., #67919 and 67921, while the following envelope will hold the after images, e.g., #67920 and 67922. So the numerical ordering system is not precise.

1980-1989: Arranged by neg # according to format

1990-2009: Arranged by site name within each binder. Negative numbers for each site are within a single range, but the negative numbers are not sequential within a single roll of film.)

PRESERVATION NEGATIVES, VARIOUS FORMATS

The term "Negative Set" (which is used in the file unit name) refers to negatives and contact sheets that were originally received in binders from the park (in 2010) and grouped by year. The contact sheets are stapled to their respective sheet of negatives in all cases. Missing years are: 1983, 1984, 1990, 1991 and 2006

NEGATIVE COLLECTION:

Includes 4x5" format film (1970-1978)

35mm format film (1973-1974)

120 & 35 mm format film (1979-)

(SCOPE breakdown of NEGATIVE COLLECTION. "NEGATIVE COLLECTION" signifies the collection that was already entered into re:d prior to receiving additional materials from the park in 2010. NEGATIVE COLLECTION is what's in the freezers?)

Includes three formats: up until 1979, 4x5" negatives were made. Starting in 1979, 120mm film was used. 35mm film was used in 1973 and 1974.

Information on each image has been entered into a park-created Access database. A few basic descriptive fields have been imported into ANCS+ at the item level. Negatives housed in envelopes have all pertinent information written on the envelope. For negatives in albums, information can be found in the bound volumes or in the Preservation Crew database and cardfile at the park (see below).

SERIES VI: NON-PARK PRESERVATION RECORDS, 1987-2003

In November 1986, at the request of John Roney, BLM Albuquerque District archeologist and Peggy Gaudy, Farmington Resource Area archaeologist, Cecil Werito and Dabney Ford from the CCNHP stabilization program assessed the stabilization needs of Twin Angels Pueblo. Based on the scope of work provided by Werito and Ford, the BLM archeologists prepared the Interagency Agreement No. NM-910-IA-003. The pueblo is under the management of the BLM and is part of the Chaco Protection Site System as established by Public Law 96-550 enacted in 1980.

In 1991, BLM and NPS entered into an Interagency Agreement to conduct necessary preservation of four pueblitos located within BLM Farmington District Office. In the succeeding years this agreement was expanded to include eight additional pueblitos in the same region. These structures are listed on the National Register of Historic Places and the planning documents for these sites identify preservation treatment and maintenance as elements of their management. This report is limited to treatment documentation photos. All architectural and archeological documentation was compiled as part of the Historic American Buildings Survey recordation completed prior to this

SERIES IX: BACKFILL PHOTO DOCUMENTATION PROJECT, 1990-2009 (bulk dates: 1994-2007)

The backfill photo documentation project was the work of volunteer NPS photographer Dave Six, for the Cultural Resources program of Chaco Culture National Historical Park. Mr. Six worked closely with Superintendent Dabney Ford on the purpose and parameters of the project. This project extensively documented in color, the "before and after" backfill of rooms and walls to record the state of the rooms and affected areas. Of note, there are black and white "before" photographs in the collection, taken by park staff photographers just before the rooms were backfilled.

Organized into 3 subseries:

A: Correspondence and Photologs
B: Chetro Ketl Site
C: Various Sites

This series documents a backfill photo documentation project for the preservation of the ruins of various sites at Chaco Culture NHP, with a particular focus on Chetro Ketl, Lizard House, Pueblo del Arroyo and Pueblo Bonito. These images, mostly of walls and masonry and kiva rooms, were created by Dave Six, a volunteer photographer for NPS. The records consist of color prints, negatives, color thumbnail, correspondence, and photologs.

SUBSERIES A: CORRESPONDENCE AND PHOTOLOGS, 1990-2009

The backfill photo documentation project was the work of volunteer NPS photographer Dave Six, for the Cultural Resources program of Chaco Culture National Historical Park. Mr. Six worked closely with Superintendent Dabney Ford on the purpose and parameters of the project. This project extensively documented in color, the "before and after" backfill of rooms and walls to record the state of the rooms and affected areas. Of note, there are black and white "before" photographs in the collection, taken by park staff photographers just before the rooms were backfilled.

This subseries is arranged first by correspondence, then followed by photologs in chronological order.

This subseries consists of correspondence and photologs for the backfill photo documentation project for the purpose of documenting preservation work on sites, communicating with supervisors on project progress, and notes on photography practices. Of note, the images are arranged by roll number. The roll number for each folder of images corresponds to the photo log.

SUBSERIES B: CHETRO KETL BACKFILL PHOTOGRAPHY, 1994-1997

The backfill photo documentation project was the work of volunteer NPS photographer Dave Six, for the Cultural Resources program of Chaco Culture National Historical Park. Mr. Six worked closely with Superintendent Dabney Ford on the purpose and parameters of the project. This project extensively documented in color, the "before and after" backfill of rooms and walls to record the state of the rooms and affected areas. Of note, there are black and white "before" photographs in the collection, taken by park staff photographers just before the rooms were backfilled.

This subseries is arranged chronologically and by photolog number.

The majority of this subseries consists of prints, negatives, and thumbnail contact sheets for the Chetro Ketl backfill project, and some Talus Unit prints and negatives. It mostly contains images of rooms, masonry walls, and kivas documenting the preservation stages of a backfill project at the Chaco Culture NPS.

SUBSERIES C: VARIOUS SITES BACKFILL PHOTOGRAPHY, 1998-2007

The backfill photo documentation project was the work of volunteer NPS photographer Dave Six, for the Cultural Resources program of Chaco Culture National Historical Park. Mr. Six worked

closely with Superintendent Dabney Ford on the purpose and parameters of the project. This project extensively documented in color, the "before and after" backfill of rooms and walls to record the state of the rooms and affected areas. Of note, there are black and white "before" photographs in the collection, taken by park staff photographers just before the rooms were backfilled.

This subseries is arranged chronologically and by photo log number.

This subseries consists of prints, negatives, and thumbnail contact sheets of various Chaco Culture NPS sites for the backfill photo documentation project. Sites include Pueblo del Arroyo, Lizard House, Pueblo Bonito, Talus Unit, and Chetro Ketl documenting walls, masonry, rooms, and kiva room areas.
