PRESIDENT  
DWIGHT D. EISENHOWER  
WHITE HOUSE  
WASHINGTON D.C.

HONORABLE SIR,:

Altho Intergration may be accompolished by force and the Persecution of ~~the~~ white children of Little Rock Arkansas, I think it one of the most disgraceful acts I have ever known in the United States

I live in what is termed the middle bracket and see more of what goes on then the people do that lives in the higher bracket, as you do

Intergration never aught to have been permitted even in the northern states

Mr. President, you are judging people as man to man and you dont see the most disgraceful situations that exist amongst the lower class of living, caused by intergration, altho mutual

is it an honer to see white women living with negros raising familys with some children white and some black,;

Mr President, it is bad enough to have intergration by mutual consent but when the Supreme Court & the Government of the United States use force against the will of the white children of the U.S.,; it is tearing down all the good prestige you have created all over the world and the United States

Mr President, I am only one amongst thousands that realise the seriousness of the situation in regards to Intergration

Laws we have to have but there is some that should be eliminated from the records

Mr, President I BEG of you for the sake of the white children to request the removal of the colored students & the troupes from Little Rock, at once

Mr President, you & your administration have done more to improve conditions in the United States then any before you BUT unless intergration is stopped at least untill a peaceful solution can be reached,; the country will be worse off then when you took office

again Mr President I beg of you to act at once in behalf of the white children of Little Rock Arkansas

THANK YOU

I AM HOPEFULLY YOURS

President of the United States of America  
The White House  
Washington, D. C..

Dear President Eisenhower:

(Please, Secretaries, let this letter pass to the addressee. I request my civil right to contact my leader in the only way possible for me as a humble citizen.)

You have been in my prayers lately. I am a mother of school children greatly concerned for the physical safety of my children even above a good education, which has been our ultimate goal in life. In this Democracy with equality, freedoms and the pursuit of happiness as a foundation; is it true that we would be forced to endanger ( the health, mental attitude and the very lives ) our children against our will? To sacrifice in war is horrible enough but this will far surpass any youth gang war and the loss will be yours and every citizen's.

Children are becoming more conscious of the differences in races than ever before, fathers are promising their sons protection in the form of guns, mothers are weeping to think of the daughters who will be exposed to venereal disease germs and the immoral ways of life that destroy home life. I believe you are doing what you think is best for the entire country and that with guidance from God you will do right regardless of unpopularity at home or abroad. Our forefathers did not take advice from other countries as to how to govern this nation they realized our problems were specific and had to be met by local contact. I have toured West Point but I would not presume to give you any military advice, however, I know of what I speak in this letter in no way that you possibly could.

Nations rise and fall. At a certain peak of prosperity decline is preceded by an intermingling of races, which is not in accord with God's laws. He does not want intermarriage nor contributing factors. Separate and equal education facilities are wanted by both races if given a chance to say so.

Guns in the hands of teen-agers would not seem the same to you who were bred on army life where power and rank rule, whereas, I have a deep respect of the ten commandments, peace among men and the needs of others .. majority rule. Please ~~tell~~ tell me why in this great Democratic country must the very ones (parents of school children of both races) who are most vitally affected having the least opportunity to help solve this problem?

May you keep a clear conscience, answerable only to God. Your greatness is truly being tested as never before.... no matter what a seemingly big horn blower, general trouble-makers and others who envy our national way of life have to say .... may the future generations be proud of you.

Thank you if you read this,

Mrs. W.D. Alexander  
Mrs. W.D. Alexander

President Eisenhower.

There must be something you could do to help the American white people.

In Chicago, we live in fear. When they will invade our neighborhood, churches & schools. Supported by white now, day empty. Because they can't support them.

The negro knows they will be protected and do as they please - Protection sometimes makes people more forward.

When the negro goes miles & miles out of their way, who is looking for trouble?

Why didn't God make us all one color? I believe he didn't want integration. and gave us men like you and Gov. Faubus to help. Our flag loved by all. Federal troops forcing our white people into what? and for what the negro, that are forcing

17/1/04  
themselves. When they have  
Wonderful schools.

Where is Liberty, Justice.

Sincerely,  
8601 So. Aberdeen St.

More forward.  
When the Negroes were driven  
out of their work, who is looking  
for trouble?  
Why didn't the Whites not all  
also? I believe he didn't work  
integration. and you are then like  
you are the. Forward help. On  
I hope have but all. Federal groups  
forming on white paper into what?  
and for what the Negro, that are forming
