

# Guide to the Olmsted Papers and Records at the Library of Congress

Manuscript Division, Library of Congress, Washington, D.C. 20540-4780  
Telephone (202) 707-5387

Prepared by Charles E. Beveridge, Series Editor, *The Papers of Frederick Law Olmsted*  
Revised from the guide published in *The Master List of Design Projects of the Olmsted Firm, 1857-1950*  
published by the National Association for Olmsted Parks, 1987

The Frederick Law Olmsted Papers and the Olmsted Associates Records are located in the Reading Room of the Manuscript Division in the Madison Building, Library of Congress. This newest Library of Congress building is at the southeast corner of the intersection of First Street SE and Independence Avenue.

## Frederick Law Olmsted Papers

(74 containers on 60 microfilm reels)

The papers have been microfilmed, and the Library of Congress has prepared a guide to them entitled, "Frederick Law Olmsted: A Register of his Papers in the Library of Congress," which is available in the Manuscript Division Reading Room and online at Library of Congress Manuscript Division Finding Aids. The papers span the years 1777 to 1952 and are divided roughly into four categories: Correspondence, which is arranged chronologically (reels 1-23); Subject, which is arranged topically by type of landscape design project (reels 24-41); Speeches and Writings (reels 41-47); and Miscellany (reels 48-51). Reels 52-60, containing material added to the collection since it was first deposited, have financial records (1855-1903), correspondence relating to Central Park, Louisville parks, Mount Royal, Niagara Falls Reservation, and the World's Columbian Exposition of 1893, as well as miscellaneous documents and writings. Individual reels of the papers, or the full set, may be purchased from the Library of Congress or ordered on inter-library loan.

## Olmsted Associates Records

A register to the Olmsted Associates Records similar to that provided for the Olmsted papers can also be consulted in the Manuscript Reading Room and online. The Olmsted Associates Records span the years 1870 to 1950 and are the records of the Olmsted landscape architectural firm during that period. They include correspondence, letterpress books, memoranda, reports, plans, specifications, lists, clippings, and other related material. The records are divided into eight series.

## Series A: The Letterpress books, 1884-99

(76 volumes on 42 microfilm reels)

The letterpress books are bound copies of letters sent, chronologically arranged, and fully indexed by name of recipient. They contain business letters, cost estimates, planting procedures and instructions, and various requests for information. Some personal correspondence is occasionally found in the business material. (From 1900 on, outgoing letters are filed in the B series Job files.) The ink has faded so badly in volumes 22 through 29 (June 1892 to Sept. 1893) that they are virtually illegible. The indexes in the volumes have been microfilmed, and are on two reels, shelf number MSS. 18,274. They can be purchased, or ordered from the Library of Congress on interlibrary loan.

## Series B: Job Files, 1871-1950

(523 containers on 479 microfilm reels)

The job files are arranged by job number and may range in size from one folder to over two hundred. The folders are stored in containers numbered B1-B523. Correspondence and other material for each job is arranged in rough chronological order. These files contain letters received and (after 1899) sent, as well as information about landscape designs and work arrangements, and notes, diagrams, and other printed matter. Most of the firm's post-1949 correspondence is in the archive of Frederick Law Olmsted National Historic Site in Brookline, Massachusetts.

There are two sets of indexes available for the job files. The first is a set of job books, which serves as a numerical index. It includes all jobs undertaken by the firm for which job numbers were created, as well as jobs in which the firm was interested, created a job number, but did not perform any work. This list consists of photocopies and is located in container B1. The second index is a microfilm copy (shelf number MSS. 15,316) of the firm's index cards for the job file and lists the jobs undertaken by the firm alphabetically, geographically, and by category. These

microfilm indexes are all incomplete to some extent. The alphabetical index--reels 1 through 6--is the most complete; the geographical index, on reel 7, is nearly as complete, while the index arranged by category of work is incomplete and unreliable.

In the Manuscript Division Reading Room there are also two oversize volumes that are copies of the master job book at Frederick Law Olmsted National Historic Site in Brookline. These volumes list the projects undertaken by the firm, by job number. (A number of projects done by Frederick Law Olmsted, Sr., did not receive job numbers and so are not listed in these volumes. Those projects have been assigned numbers in the 12000 range by the editors of the Olmsted Papers.) For anyone seeking information about any of the firm's landscape design projects, series A and B are the most extensive and will probably be the most useful.

**Series C: General Correspondence, 1884-95**

(4 containers)

The correspondence in this series is largely routine in nature. It contains work requests and comments about park and estate development.

**Series D: Special Correspondence, 1874-99**

(4 containers)

Most of the correspondence in this series relates to the landscaping of the World's Columbian Exposition. In addition, five letterpress books contain material dated 1874-91 relating to the US Capitol Grounds.

**Series E: Business Records, 1868-1950**

(19 containers)

This series contains reports of visits to job sites as well as quarterly and monthly reports, nursery orders, journals, ledgers. The material is arranged by type of record. Boxes E3 through E10 contain the very important reports of visits for projects underway during the years 1891-99 and 1911-24.

**Series F: Scrapbooks and Albums, 1893-1917**

(13 containers)

This series contains bound newspaper clippings arranged by subject with a loose chronological arrangement within each volume. It also contains photograph albums.

**Series G: Miscellany, 1890-1950** (2 containers)

This series contains miscellaneous letters, letter fragments, resolutions, and deeds that are arranged by type of material or by subject.

**Series H: Family Papers, 1868-1903**

(9 containers)

This series contains journals, account books, letterpress books, and family and personal letters. The material is grouped by type of material, with each group having either a chronological arrangement, or a combination alphabetical-chronological arrangement.

**Series OV: Oversize and Undated**

(13 containers)

Plans and other visual materials organized by job number

**Laura Wood Roper Papers**

(19 containers on 10 microfilm reels)

The papers of Olmsted's biographer, containing her research materials, working papers, and correspondence as well as a number of original documents. A register for this collection is available in the Manuscript Division Reading Room, and online.
