Introduction

Golden Gate National Recreation Area

Park Description

Golden Gate National Recreation Area (GGNRA), a unit of the National Park Service, was established by an Act of Congress on October 27, 1972. The 80,000-acre park encompasses a great diversity of cultural and natural resources in and around the Bay Area of San Francisco, California. It includes Muir Woods National Monument and Fort Point National Historic Site.

The park holds almost five million three-dimensional and documentary artifacts dating from the time before European contact to the present. They are preserved and maintained for the public by the Division of Cultural Resources and Museum Management, which includes the Park Archives and Records Center (PARC).

Park Archives and Records Center (PARC)

Historical Note

GGNRA and the sites within it have been collecting records since their inception. The PARC was established in 1994 to receive records and archival collections from the U.S. Army and the Presidio Army Museum after the closure of the Presidio of San Francisco as an Army base. The collections continue to grow through the donation of materials by private individuals, transfer of inactive park records by staff, and acquisition of relevant documentary materials.

Scope of Collections

The archival collections in the custody of the GGNRA document the history and activity of the various sites and groups associated with the park, described in the park's Scope of Collection Statement (2009).

The PARC contains U.S. Army and National Park Service facility records for the Presidio of San Francisco, forts and coast defense sites in the area, and various GGNRA sites. Subjects and sites documented include the United States Army (Bear Flag Revolt, Civil War, Spanish-American War, Mexican War, World War I, Army Air Service, Coast Artillery, Army medical facilities and issues, World War II, Army support during natural disasters, Viet Nam War, and Operation Desert Storm); Alcatraz Island (Army fortress, Army Disciplinary Barracks, U.S. Penitentiary, and Indian Occupation); the natural resources conservation movement resulting in the establishment of Muir Woods National Monument; agriculture in the Marin Headlands; Point

Reyes Peninsula and Bolinas Lagoon areas; U.S. Lifesaving/Coast Guard Services; San Francisco Earthquake and Fire of 1906; Panama Pacific International Exposition of 1915; natural resources and environmental issues; and preservation of open space in the Bay Area. Also included in the PARC are many of the GGNRA administrative records that document the development and expansion of this park.

Visiting the PARC for Research

The PARC is located in an historic brick building, formerly a cavalry stable, on the Presidio of San Francisco. Collections and archives support services are available for walk-in research during open hours or by appointment. Please contact the PARC (see below) for the current schedule of reference hours.

Copy Services

Black and white photocopy services for standard and oversize materials are available on-site. Color photocopying, photographic duplication, and duplication of other media are available by special arrangement. Researchers are charged for all duplicates on a cost-recovery basis.

Rights and Publications

Copies are provided under the Fair Use provisions of the Copyright Law (Title 17, U.S.C.). Researchers must complete a Permission to Publish Contract with the Park Archivist for any other intended use of these materials (such as publication or exhibit). Researchers should consult with staff regarding their needs for commercial or public use of materials.

Legal Status of Holdings

Many holdings of the PARC were acquired/transferred prior to the establishment of the archives program, and have little documentation on their provenance (source/chain of custody). All materials received after 1994 have been accessioned and documented. If provenance cannot be determined, the PARC assumes that it owns the property rights, but does not own the copyright. Staff will provide assistance, but it is the responsibility of the researcher to acquire permission from the copyright holder to cite, quote, or reproduce collection materials.

Collections developed by or for government organizations or operations are in the public domain and may be used, cited, and quoted without restriction, provided they are properly credited to the PARC. The archives contain no national security classified materials.

Donations to the Collections

The PARC welcomes donations of a variety of historic materials that meet the criteria in the Scope of Collections Statement and do not duplicate existing holdings. Collections are

maintained for research use in perpetuity; there is no guarantee that items will be exhibited. If you own materials that may be relevant to the themes of GGNRA and would like to deposit them in the PARC, please consult with an archivist.

How to Use This Finding Aid

This document contains information on the contents and significance of an archival collection. It includes descriptive information; repository information; collection history; biographical or historical information on creators of the collection; and a container or folder list of everything in the collection. After reviewing the finding aid, please discuss your specific needs with the archivist who will locate and retrieve the relevant materials.

How to Use the Collections

Please follow all rules and regulations regarding research, the use of the research facility, and the handling of collection materials. This will protect the collections so they continue to be available and usable for generations to come. If anything appears to be out of order or damaged, please notify a staff member.

2 oversize boxes [0.6 LF]
11 map folders [1.1 LF]
1 mega map folder [0.1 LF]
3 rolled map tubes [0.9 LF]

Provenance

Materials related to the General Management Plan were generated into a collection as required by NPS policy. Information was gathered under the direction of Doug Nadeau, Planning Coordinator for the Park; Ron Treabess, Project Manager for the Denver Service Center; and Greg Moore and Rolf Diamant, planners employed by the Denver Service Center. Information for the GMP was also collected by independent contracting companies with the park: Sasaki Walker Association (SWA) and Royston/Hanamoto/Beck/Abby (RHBA).

Some material does not fall into the GMP, but still has relevance to the National Park Service. Included are some studies/reports unrelated to the GMP, Leases/Requests for Proposals for different GOGA buildings, and a library collection. These materials may have all contributed to the background information for the GMP planning process.

The collection was stored in the basement of the park headquarters building for many years before being accessioned into the Park Archives & Records Center collections in 2005.

Scope Note/Description

This collection consists of materials collected during the development of the GGNRA General Management Plan. It includes background and source material, planning files, public meeting materials, graphics and other documents relating to the contracts to research potential uses for the lands encompassed within the recently developed Golden Gate National Recreation Area. The General Management Plan process incorporates proposals for development and use of various land sites and features and includes a rigorous public process to review alternatives. The resulting document, the General Management Plan, lays out a program for a national park area for a period of ten to fifteen years into the future.

The collection is divided into three series: Park Planning, GGNRA Studies/Reports, and the Library Collection.

Park Planning consists of Leases/Requests for Proposals for various GOGA buildings and public meetings/workshops held with Bay Area organizations for the GGNRA Alternatives Studies.

The GGNRA Studies/Reports section is primarily made up of the GGNRA North & South Alternatives Studies. These studies were conducted to bring more people into the GGNRA planning process and are a part of the GMP. The Typescript Reports, Work Directives, Golden Gate Recreational Travel Study (GGRTS), and Boundary Surveys are also studies that were performed to inform and support the GMP. The Wastewater Program, Alcatraz Island, Fort Mason, and Fort Point studies are not related to the GMP.

The library collection consists of a paper card catalog system, reading material, publications, newspaper clippings and miscellaneous material.

Significance:

This collection is an excellent source on the history and development of the GGNRA. The studies and reports contain useful information for researchers about GGNRA, primarily of the 1970s. The GMP element of the collection is valuable to anyone who is interested in preparing or updating the park's administrative history. The library collection is helpful to both researchers and visitors who want general information about the area, including hiking/biking/walking trails, brochures, visitor guides and maps, etc.

Related Records: Please note that this list is not comprehensive. It is intended as an aid to researchers. For more complete information, consult the reference archivist.
