Introduction

Golden Gate National Recreation Area

Park Description

Golden Gate National Recreation Area (GGNRA), a unit of the National Park Service, was established by an Act of Congress on October 27, 1972. The 80,000-acre park encompasses a great diversity of cultural and natural resources in and around the Bay Area of San Francisco, California. It includes Muir Woods National Monument and Fort Point National Historic Site.

The park holds almost five million three-dimensional and documentary artifacts dating from the time before European contact to the present. They are preserved and maintained for the public by the Division of Cultural Resources and Museum Management, which includes the Park Archives and Records Center (PARC).

Park Archives and Records Center

Historical Note

GGNRA and the sites within it have been collecting records since their inception. The PARC was established in 1994 to receive records and archival collections from the U.S. Army and the Presidio Army Museum after the closure of the Presidio of San Francisco as an Army base. The collections continue to grow through the donation of materials by private individuals, transfer of inactive park records by staff, and acquisition of relevant documentary materials.

Scope of Collections

The archival collections in the custody of the GGNRA document the history and activity of the various sites and groups associated with the park, described in the park's Scope of Collection Statement (2009).

The PARC contains U.S. Army and National Park Service facility records for the Presidio of San Francisco, forts and coast defense sites in the area, and various GGNRA sites. Subjects and sites documented include the United States Army (Bear Flag Revolt, Civil War, Spanish-American War, Mexican War, World War I, Army Air Service, Coast Artillery, Army medical facilities and issues, World War II, Army support during natural disasters, Viet Nam War, and Operation Desert Storm); Alcatraz Island (Army fortress, Army Disciplinary Barracks, U.S. Penitentiary, and Indian Occupation); the natural resources conservation movement resulting in the establishment of Muir Woods National Monument; agriculture in the Marin Headlands; Point Reyes Peninsula and Bolinas Lagoon areas; U.S. Lifesaving/Coast Guard Services; San Francisco Earthquake and Fire of 1906; Panama Pacific International Exposition of 1915; natural resources and environmental issues; and preservation of open space in the Bay Area. Also included in the PARC are many of the GGNRA administrative records that document the development and expansion of this park.

Visiting the PARC for Research

The PARC is located in an historic brick building, formerly a cavalry stable, on the Presidio of San Francisco. Collections and archives support services are available for walk-in research during open hours or by appointment. Please contact the PARC (see below) for the current schedule of reference hours.

Copy Services

Black and white photocopy services for standard and oversize materials are available on-site. Color photocopying, photographic duplication, and duplication of other media are available by special arrangement. Researchers are charged for all duplicates on a cost-recovery basis.

Rights and Publications

Copies are provided under the Fair Use provisions of the Copyright Law (Title 17, U.S.C.). Researchers must complete a Permission to Publish Contract form with the Park Archivist for any other intended use of these materials (such as publication or exhibit). Researchers should consult with staff regarding their needs for commercial or public use of materials.

Legal Status of Holdings

Many holdings of the PARC were acquired/transferred prior to the establishment of the archives program, and have little documentation on their provenance (source/chain of custody). All materials received after 1994 have been accessioned and documented. If provenance cannot be determined, the PARC assumes that it owns the property rights, but does not own the copyright. Staff will provide assistance, but it is the responsibility of the researcher to acquire permission from the copyright holder to cite, quote, or reproduce collection materials.

Collections developed by or for government organizations or operations are in the public domain and may be used, cited, and quoted without restriction, provided they are properly credited to the PARC. The archives contain no national security classified materials.

Donations to the Collections

The PARC welcomes donations of a variety of historic materials that meet the criteria in the Scope of Collections Statement and do not duplicate existing holdings. Collections are maintained for research use in perpetuity; there is no guarantee that items will be exhibited. If you own materials that may be relevant to the themes of GGNRA and would like to deposit them in the PARC, please consult with an archivist.

How to Use This Finding Aid

This document contains information on the contents and significance of an archival collection. It includes descriptive information; repository information; collection history; biographical or historical information on creators of the collection; and a container or folder list of everything in

the collection. After reviewing the finding aid, please discuss your specific needs with the archivist who will locate and retrieve the relevant materials.

How to Use the Collections

Please follow all rules and regulations regarding research, the use of the research facility, and the handling of collection materials. This will protect the collections so they continue to be available for generations to come. If anything appears to be out of order or damaged, please notify a staff member.

Description

Office files, organizational files, newspapers, clippings, photographs, slides, video cassettes, audio cassettes, reel-to-reels, and other office material dealing with roughly 70 years of office work at the Presidio Public Affairs Office. This includes a set of *The Star Presidian* from 1952-1965 and 1972-1995.

Provenance

Public Affairs Office (PAO) fulfills the Army's duty to keep the community surrounding the Presidio, and in the Presidio informed of the Army's activities. They gave tours, wrote press releases and generals' speeches, assisted with historical publications, and granted interviews. The staff opened and answered mail for

information requests, issued permits to use PSF grounds for community activities, and organized events for the public to attend. The staff also published a newspaper, *The Star Presidian*, which was released on base. The material came to the park in 1995 when PAO was finally dissolved as part of the base closure and transfer to GGNRA in 1994.

Scope Note

Scope:

Public Affairs Office managed the community and public relations for the 6th Army and the Presidio. The staff, both civilian and military employees, answered requests for information, forwarded permit requests through the chain of command, and wrote tours and speeches. The material in this collection is an accumulation of their daily work activities.

Significance: This collection is an excellent source of information about army-public relations both from the public and army perspectives, especially during the 1990's. It includes internal documents through the chain of command concerning public opinion and the army reaction.

The collection is also a good source of historical background on the Army Reserve program in the thirteen western states of the US from the 1965-1983. Each unit had to file an annual supplement with the 6th Army, giving an overview of its activities generally from October 1 until September 31 the following year for the command to review.

Organization and Arrangement

The records are organized into 13 series.

- Series I: Public Information: Presidio History, 1850-1985

B121	F2	V14 N23	10/29/1965	2	

The Star Presidian ceased to print for 7 years. When they began printing it again they began with V1 N1 and V1 N2, after this second edition the editors reverted back to the last volume numer V14 but did not pick up the edition number from 1965's run so there are two different sets of V14 N3-16
