Superintendent

In accordance with regulations and the delegated authority provided in Title 36, Code of Federal Regulations (36 CFR), Chapter 1, Parts 1-7, authorized by Title 54 United States Code § 100751, the following provisions apply to all lands and waters administered by the National Park Service, within the boundaries of Hagerman Fossil Beds National Monument (HAFO). Unless otherwise stated, these regulatory provisions apply in addition to the requirements contained in 36 CFR, Chapter 1, Parts 1-7.

Written determinations, which explain the reasoning behind the Superintendent's use of discretionary authority, as required by Section 1.5(c), appear in this document identified by *italicized print*.

**36 CFR § 1.5 – VISITING HOURS, PUBLIC USE LIMITS, CLOSURES, AND AREA DESIGNATIONS FOR SPECIFIC USES OR ACTIVITIES**

**(a)(1) The following visiting hours, public use limits, and closures are established:**

Visiting Hours:

- The Monument is open every day of the year, 24 hours a day.
- The HAFO administration office is open Monday through Friday, 8 a.m. to 4 p.m. as staffing permits.
- The HAFO Visitor Center is open 7 days a week from Memorial Day to Labor Day from 9 a.m. to 5 p.m. The remainder of the year the HAFO Visitor Center is open 5 days per week, 9 a.m. to 5 p.m. as staffing permits. Visitors are encouraged to phone 208-933-4105 to confirm hours.

*These operational needs are set to balance the needs of public access, visitor safety, and protection of property.*

**Public Use Limits – Pursuant to §1.5(d) to implement a public use limit, the Superintendent may establish a permit, registration, or reservation system:**

- Leaving property unattended for any period of time requires a permit.

*Leaving unknown property unattended in the Monument area threatens public safety, the environmental and scenic values of the Monument, the natural and cultural resources of the Monument, and the orderly management of the Monument. Visitors seeking to leave property unattended within the Monument must obtain a permit from the Superintendent.*

**Closures:**

- Launching, landing or operating an unmanned aircraft from or on lands and waters administered by the National Park Service within the boundaries of Hagerman Fossil Beds National Monument is prohibited except as approved in writing by the Superintendent.
  - ❖ The term “unmanned aircraft” means a device that is used or intended to be used for flight in the air without the possibility of direct human intervention from within or on the device and the associated operational elements and components that are required for the pilot or system operator in command to operate or control the device (such as cameras, sensors communication links). This term includes all types of devices that meet this definition (e.g., model airplanes, quad-copters, drones) that are used for any purpose, including for recreation or commerce.

*Use of unmanned aircraft within HAFO poses a disturbance to wildlife in the Monument and interferes with other Monument visitors who come to appreciate and photograph the scenic resources. The unrestricted use of unmanned aircraft is incompatible with the mission to protect Monument resources and to ensure visitor enjoyment within the Monument. Unrestricted use of unmanned aircraft could impact sensitive wildlife, result in unnecessary noise, and pose a potential danger to Monument visitors. This prohibition complies with the NPS Director’s Policy Memorandum 14-05 (Unmanned Aircraft--Interim Policy; June 19, 2014).*

- The Superintendent may temporarily close the park roadways, parking area, facilities, waters, and all or portions of the park when such actions are deemed necessary to ensure public safety, protection of resources, or the avoidance of visitor use conflicts. The posting of signs, maps, media announcements, and the use of barricades and/or gates will identify such closures.
- Gravel roads leading to Bell Mutual Irrigation Company pump stations are closed near the Snake River in two locations commencing at the locked gates:
  1. The southern fork leading to the now destroyed Bell Rapids pump station, and
  2. The northern fork located at the last turn-around before the Fossil Gulch pump station.

- Two gated access roads leading to the abandoned gravel quarry north of the Snake River View Overlook.
- The roads located at the south end of the Monument that parallel the Emigrant Trail and the Oregon Trail.
- An Area Closure of a two-acre Special Use Zone around the Fossil Gulch pump station facilities.

*These facilities and areas are administrative sites used by the National Park Service in the management of the Monument. Visitor entry of these areas would interfere with park operations and the protection of government property, and in some cases create a safety hazard for the public and park employees. Less restrictive measures would not suffice to provide safety and security of government operations and employees.*

- Operation of motorized vehicles not licensed for highway use, including all off-road motorized vehicles, on all park roads is prohibited.

*Off-road motor vehicles including ATVs and UTVs are not designed for use on paved or public roads.*

- Any area closed by the Superintendent and identified with an official sign is prohibited to public access. This includes all park maintenance compounds, outbuildings and service roads that are only used for official business.

*Areas may be temporarily closed for a variety of reasons including site restoration, protection of endangered or threatened animal and plant species, protection of fragile cultural and/or historic sites, and for visitor safety. Maintenance compounds and other work areas are restricted from public access to protect government property from theft and vandalism and to prevent safety issues related to the operation of heavy machinery and power equipment.*

**(a)(2) Designate areas for a specific use or activity, or imposed conditions or restrictions on a use or activity:**

Areas Designated for a Specific Use or Activity:

- The Natural Zone (82%) – Includes the Paleontological/Research Subzone, the Natural Environment Subzone, and the Hunting/Fishing Subzone.

The Natural Zone will be managed to conserve natural resources and ecological processes and to provide for their use and enjoyment by the public in ways that do not adversely affect these resources and processes.

- The Cultural Zone (12%) – Includes the Oregon Trail.

Preservation and interpretation of the cultural values associated with the Oregon Trail will take precedence in this zone. This may include providing trail access for visitors, consistent with cultural resources protection laws and policies.

- The Park Development Zone (2%) – Includes areas allowing development of facilities.

Areas in this zone will be managed to provide and maintain facilities serving park managers and visitors.

- The Special Use Zone (3%) – Includes areas allowing NPS administration to be secondary to another agency.

This zone will primarily include existing utility corridors and pump-related facilities such as the pump access road, pumps, and pipeline. Consistent with legislation and property rights, these facilities can be operated and maintained to accomplish their purpose.

- The Paleontological/Research Subzone (57%), public access is limited to the following:
  1. Designated parking areas and trails,
  2. Areas stated in an approved permit, and/or
  3. Accompaniment by NPS staff.

This is approximately 70% of the designated Natural Zone. Although the basic management strategy of the Natural Zone will apply, manipulative research and resource management activities consistent with the Monument's purpose can occur in this subzone even though such activities otherwise would not be compatible in natural zone areas. This subzone will include most of the Monument. Visitor use in this subzone will occur under restrictions such as permits or supervision to ensure that such use will be compatible with research activities, resource protection, protection of scientific values, and other management objectives.

- The Hunting/Fishing Subzone – Is designated by Public Law 101-512 as that area within 50 feet of the high water mark of the Snake River, hunting may occur during and in accordance with Idaho State Wildlife regulated seasons and methods.

This designation will permit hunting and fishing and the maintenance of structures necessary for those activities, as legislatively required. Hunting and fishing normally are seasonal activities, when no hunting or fishing is occurring, the subzone will be managed the same as the Paleontological Research subzone adjoining it.

*National Park Service Management Policies require that general management plans prescribe a system of management zoning for park lands and waters to designate where various strategies for management and use will best fulfill management objectives and achieve the purpose of the park. Management zones, which are prescriptive, are used as a framework for specific planning and management decisions on the use and development of the Monument. They are derived from an evaluation of the Monument purpose and significance, management goals, desired future conditions, and the nature of the Monument's resources and uses.*

### Conditions and Restrictions on Specific Uses or Activities:

- E-bikes – The term “e-bike” means a two- or three-wheeled cycle with fully operable pedals and an electric motor of less than 750 watts (1 h.p.).
  - E-bikes are allowed in Hagerman Fossil Beds National Monument where traditional bicycles are allowed. E-bikes are prohibited where traditional bicycles are prohibited. Except where use of motor vehicles by the public is allowed, using the electric motor to move an e-bike without pedaling is prohibited.
  - A person operating an e-bike is subject to the following sections of 36 CFR part 4 that apply to the use of traditional bicycles: sections 4.12, 4.13, 4.20, 4.21, 4.22, 4.23, and 4.20(h)(2)-(5).
  - Except as specified in this Compendium, the use of an e-bike within Hagerman Fossil Beds National Monument is governed by State law, which is adopted and made a part of this Compendium. Any violation of State law adopted by this paragraph is prohibited.
  
- Swimming or wading:
  - Use of soap, detergent or other cleaning products while swimming or wading is prohibited in waters within Hagerman Fossil Beds National Monument.

*Restricting use of soaps is necessary to prevent impacts to the Monument’s natural resources.*

- Passenger Carrying Busses:
  - Engines must be shut down when not underway.

*The idling of bus engines adds unnecessary exhaust fumes to the air and diminishes the enjoyment by visitors of the peace and tranquility of the Monument.*

- Hiking and Pedestrian Use:
  - Hiking and pedestrian use is restricted to the Monument’s trails and walkway system.
  - Leaving a trail or walkway to shortcut between portions of the same trail or walkway, or to shortcut between portions of the same trail or walkway is prohibited.

*Restricting hikers and pedestrians to the Monument’s trails and walkways helps protect the fragile habitat and natural resources of the Monument.*
