spotted sandpiper

Often seen making short flights ahead of vessels, spotted sandpipers are the most common shorebird on the rivers.

In This Stretch

- This stretch can be very challenging in low water conditions causing paddlers to continually dodge large rocks and boulders.
- Approximately 300 yards of boulders, plus Class I and II rapids come up suddenly before the **Scott Bridge**. It is best to paddle to the left.
- You can sometimes run the chute of **Coppermine Dam**, but make sure you scout it first or use the portage on the right.
- Winding Class I and II rapids at **Fish Trap Rapids** are considered the most challenging on the Riverway, and no portage exists.
- A smaller set of Class I rapids called **Little Fish Trap Rapids** exists right before the **CCC Bridge Landing**.
- There are more rapids around **Big Island** and as you approach **Riverside Landing**.
